

Automate Your Manual COVID Screening Process

ODIN™ Fahrenheit 2.0

ODIN Fahrenheit 2.0 is an automated screening kiosk that replaces manual COVID-19 screening. Enhancing your safety screening procedures. Fahrenheit combines user defined screening questions, automated badge printing, facial recognition and thermal imaging for quick temperature checking into an easy to deploy kiosk that doesn't need to be physically staffed.

Strategically place ODIN Fahrenheit at entrances or in areas where people can safely self-screen prior to entering main buildings.

If someone fails a screening, a designated person can be discreetly notified via text, call or e-mail so safety protocols are followed.

Benefits

- Improve COVID-19 safety plan
- Increase overall safety for everyone
- Reduce labor costs through automation
- Scalable to any sized business
- Compliance tracking
- Premises tracking of visitors
- Easy self-installation
- Powerful reporting
- Ability to integrate into access control

Applications

- | | |
|----------------------------|------------------------|
| • Hospitals | • Distribution centers |
| • Senior living facilities | • Transportation hubs |
| • Schools | • Sporting events |
| • Restaurants | • Retail stores |

Features
